

# Artificial Intelligence

**Komal Chaurasiya**

# What is Artificial Intelligence?

Answer: The power of a machine to copy intelligent human behavior.

Right???

# Robots at Artemis

Are they really intelligent?

A robot is only as smart as its initial program.

```
checkLogin(){  
  (document.getElementById('inp_user').value==  
    alert('Please insert your username');  
  return false;  
)  
document.getElementById('inp_pass').value==  
  alert('Please insert your password');  
  return false;  
}
```

Answer: The power of a machine to copy and learn from intelligent human behavior.

# Artificial Intelligence VS. Robot

## AI

Programmed to think

Social Interaction

Learns

## Robot

Programmed to do

Low level interaction

Only as smart as program

# Artificial Intelligence Tests

## Turing Test

Developed by Alan Turing

Involves an interpreter, a human, and a computer.

The computer and human have separate conversations with the interpreter.

If the interpreter can't guess which is the computer or if the interpreter gets it wrong then the computer has Artificial Intelligence.

# Artificial Intelligence Tests

## Imitation Game

Involves two tests

First test involves an interpreter, a male, and a female.

Female pretends to be male

Interpreter tries to figure out who is who

Second test is similar to turing test

Compares both tests

# Artificial Intelligence Tests

## Turing Test

Turing test the computer results to itself  
and not to humans

## Imitation Game

Imitation game compares the robots results  
to human results

# Examples

## 1. CleverBot

## 2. Autonomous Cars

## 3. Drones

## 4. Watson

# Problems

Although AI is advancing it can still be problematic.

# AI Controversies

Potential job takeover

Growing laziness

Growing Cost

Priority Argument

Robot Relationships?

# Why it Matters

In the future AI is going to be everywhere.

It is important to know about it and understand it.

This is because we may be interacting with it on a day to day basis.

We learned at Artemis about the different robots that use AI

We also learned when robots need AI and when they don't.

# Thank You!!
